

ROAD SAFETY POLICY

CONACON, since its origins, has considered Road Safety as an essential factor in its activity and has assumed it as a primary purpose in the organization. Along these lines and aware of its Corporate Social Responsibility, it wants to continue providing all the resources that allow the permanent improvement of preventive action, in order to raise the level of protection, the safety of all its employees and collaborators. This commitment is embodied in its ROAD SAFETY POLICY which is based on the following lines of action:

- The model of government based on **Road Safety**.
- Promote the **continuous improvement** of your security management system Road, proceeding to adapt it when deviations are detected.
- Compliance with the requirements of the applicable regulations in force.
- In addition, the commitment to other requirements related to the Road safety.
- Thorough analysis and determination of the **causes of incidents** to prevent injuries and accidents, as well as to avoid their repetition
- The **Integration of partners and suppliers** in the application of the Road Safety management system.

For the assumption of the preventive culture by the company's employees and interested parties, based on this prevention policy, CONACON's Senior Management defines the objectives for Road Safety performance, monitoring them.
